

MATT FISKE, Electrical Engineer

Matt Fiske holds a BSEE degree from the University of Illinois and an MBA degree from Northwestern University. He is a registered Professional Engineer and Project Management Professional.

Mr. Fiske has been with RO Associates for over ten years. He has consulted with hundreds of companies – conducting design reviews and performing power, grounding and lightning protection surveys. This includes visiting sites to perform tests and collect data, analyzing findings and developing detailed reports to recommend solutions to reduce or eliminate electrical system-related downtime and enhance operations.

Mr. Fiske has delivered hundreds of training courses associated with power, grounding and lightning protection. He has been the speaker at numerous technical conferences.

His industry experience includes: consumer packaged goods, data centers, electrical utilities, government (e.g., DOD, DOT, NASA), oil and gas, railroad, telecommunications.

His previous work experience while employed by AT&T, General Mills and Digital Equipment Corporation includes problem resolution in power, control, instrumentation and grounding for sensitive electronic equipment. He also has an extensive consulting background in electrical planning, design and installation pertaining to the process control and telecommunications industries and has developed applicable standards and specifications as well as conducted related site surveys and training.
